ABOUT ME

Motivated and detail-oriented Frontend Web Developer with a solid foundation in HTML, CSS, JavaScript, and modern frontend frameworks. Committed to building intuitive and user-friendly web interfaces, with a continuous drive to learn and grow. Seeking an opportunity in a forward thinking organization where I can apply my skills, expand my technical capabilities, and contribute meaningfully to team and project success.

WORK EXPERIENCE

Nov 2024 - Present
Accenture Philippines | 2nd Project - Risk Management
Frontend Developer | Backend Exposure

- Developed a clean, responsive UI using Angular, TypeScript, and Angular Material to help users track and manage risks efficiently.
- Implemented an AI Support chatbot using Amethyst, providing users with real-time assistance and guided support within the application.
- Integrated frontend with a C#.NET backend and PostgreSQL database for smooth and dynamic data interaction.
- Focused on user-first design, real-time data visualization, and optimized user experience across devices.

Jan 2024 - Nov 2024
Accenture Philippines | 1st Project - Equity Management
Frontend Developer | Backend Exposure

- Built responsive UI components using Angular, TypeScript, and Angular Material.
- Developed clean, user-friendly interfaces for tracking and managing employee equity plans.
- Integrated frontend with Node.js APIs and PostgreSQL backend for dynamic data handling.
- Focused on performance, usability, and seamless user experience.

2023
Accenture Philippines
Intern | Frontend Developer

- Working with the development team.
- Manage Frontend development (Angular, Bootstrap)
